Introduction

Embark on a journey of boundless creativity with us, as we, the photographers, strive to ignite your imagination and cultivate an extraordinary space for all you amazing individuals. Immerse yourself in the vibrant ambiance of our creative portrait playground located in Newcastle, known as The Venue on Hunter. Here, the energy is infectious, and the possibilities are as limitless as your creativity.

Capturing stunning photos with your smartphone is easier than you think! In this guide, we'll walk you through five simple steps to elevate your photography game. No need for complex technical jargon – just straightforward tips to help you take better photos effortlessly.

How to Use a Ring Light & Phone Holder

Sometimes using our ring lights & Clicker combo can be a bit tricky!

1. Connect our Bluetooth clicker & open your camera app
2. Position the ring light in front of your scene with how you want the light to face.
3. Adjust the Brightness of the light.
4. Place your phone in either the ring light or portable mount.
5. Take your position, pose and snap with the Bluetooth clicker!

PROTIP: Experiment with different angles / brightness of lighting

5-Steps for Better Photos on Your Smartphone

1. **Clean Your Lens:** A clean lens ensures crisp, clear photos. Swipe your phone's camera lens with a soft cloth before snapping pictures to avoid any smudges that could affect image quality.
2. **Set Good Lighting:** Experiment with the ring lights angles & intensity to banish shadows. Remember where ever you point the light shadows will fall!
3. **Use Grid Lines:** Most smartphones have grid line options in the camera settings. Enable them to help you align your shots. The rule of thirds – placing your subject off-centre – often leads to more visually appealing photos.
4. **Hold Steady:** Avoid shaky photos by maintaining a steady hand. If possible, use a tripod or your phone holder to stabilize your device. This ensures sharper images, especially in low-light conditions.
5. **Experiment with Angles:** Don't be afraid to explore different angles and perspectives. Experimenting with high and low angles can add interest to your photos, making them stand out.

5 Tips to Better Posing

- 01 Natural Stance:** Relax your body and stand naturally. Avoid stiff poses, and let your arms fall naturally by your sides.

 - 02 Smile Naturally:** Capture genuine smiles by thinking of something that makes you happy. This will help you avoid forced and awkward expressions.

 - 03 Play with Hair and Accessories:** Add movement and personality to your photos by playing with your hair or adjusting accessories. Small movements can make a big impact.

 - 04 Shift Your Weight:** For a flattering look, shift your weight to one leg. This creates a more relaxed and dynamic pose.

 - 05 Use Props:** Incorporate props that reflect your personality or the theme of your photo. This adds depth and interest to your pictures.
